ORAL & MAXILLOFACIAL FACIAL SURGERY

Applied surgical anatomy of facial nerve in oral and maxillofacial surgery. 1. The main trunk of the nerve exits the stylomastoid foramen and immediately enters the parotid gland. The most consistent and reliable landmark for identification of the facial nerve is the tympanomastoid suture. This suture line between the tympanic and mastoid portions of the temporal bone points to the stylomastoid foramen, which is 6 to 8 mm beneath (medial to) the "drop-off" point of the ...
