transferring genes.

Chapter 19: Viruses

Viruses are the smallest and simplest life form known. They are 10 to 100 times smaller than bacteria.; The biggest difference between viruses and bacteria is that viruses must have a living host - like a plant or animal - to multiply, while most bacteria can grow on non-living surfaces.

Chapter 19 (Bacteria/Virus) and 40-2 The Immune System

Viruses infect all forms of organisms including bacteria, archaea, fungi, plants, and animals. Living things grow, metabolize, and reproduce. Viruses replicate, but to do so, they are entirely dependent on their host cells. They do not metabolize or grow, but are assembled in
