Sabre Interact Manual Reservation System

To be able to use the SABRE Reservation System you must first sign in. To sign in, the entry will always begin with SI followed by a sign-in code, which can be a combination of between 1 and 6 digits.

Sabre Reservation manual - FlyingWay

Before the introduction of SABRE, the airline's system for booking flights was entirely manual, having developed from the techniques originally developed at its Little Rock, Arkansas reservations center in the 1920s. In this manual system, a team of eight operators would sort through a rotating file with cards for every flight.

Working in the Sabre system page 10 D U TY COD ES Note: Duty codes are system access rights that determine the range of functions that an agent can perform in the Sabre system. These are stored in your EPR and vary according to an agent's duties.

Working in the Sabre System

There are three levels of itinerary pricing and ticketing in SABRE. All known as "PHASES". Phase 3 SABRE will automatically price the PNR at the fare required. This would be guaranteed once ticketed, Phase 3.5 SABRE does not automatically price the itinerary at the fare required and another fare basis needs to be forced into the pricing entry.

Sabre Reservation System Manual - modapktown.com

The Sabre reservation system was built in 1960, with lessons learned from IBM's mid-1950s project to build the gigantic SAGE (Semi-Automatic Ground Environment) air defense computer system. At first, Sabre just operated in one location, Briarcliff Manor, New York, with two IBM ® 7090 computers. By the end of 1964, this new system was handling 7500 reservations per hour. The average time to process a reservation in the old manual card system was 90 minutes. Sabre cut it to seconds.
