Solutions to Problem Set #8:

Introduction to Game Theory 1) Consider the following version of the prisoners dilemma game (Player one's payoffs are in bold):

Player Two	Cooperate	Cheat
Player One Cooperate	\$10 \$10	\$0 \$12
Cheat	\$12 \$0	\$5 \$5

a) What is each player's dominant strategy? Explain the Nash equilibrium of the game.

Problem 3 We say that a player has a winning strategy if, whatever the other player does, he has a strategy that guarantees that he wins. In the following game one of the players has a winning strategy, namely if he follows it he will always win. Two players alternate in taking turns to remove some sticks from a set of 4.
